REMAC ADVISORY 2010 – 02

Effective Date: Immediately

Re: Vecuronium shortage – Rocuronium Substitution

Background: Due to a nationwide shortage of Vecuronium the MAC has approved the substitution of Rocuronium for all MFI credentialed agencies

This is a replacement / substitution and not an addition to the required formulary for all agencies in the Region.

Action: Agencies credentialed in MFI may substitute Rocuronium for Vecuronium as their defasciculating agent and long-term paralytic medication. They must train providers prior to placing the medication in service, and must have only one agent available.
